Online Library Journals Impact Factor Ranking

This list provides a simple impact factor, computing a ratio of the number of citations by the number of items in the series. Citation counts are adjusted to exclude citations from the same series. These computations are experimental and based on the citation analysis provided by the CitEc project, which uses data from items listed in RePEc.

Simple Impact Factors for Economics Journals | IDEAS/RePEc

Again, the impact factor should be used with informed peer review. Citation frequencies for individual articles are quite varied. There are many artifacts that can influence a journal's impact and its ranking in journal lists, not the least of which is the inclusion of review articles or letters.

The Clarivate Analytics Impact Factor - Web of Science Group

Online Library Journals Impact Factor Ranking

Journal Impact Factor (JIF) is calculated by Clarivate Analytics as the average of the sum of the citations received in a given year to a journal's previous two years of publications (linked to the journal, but not necessarily to specific publications) divided by the sum of "citable" publications in the previous two years.

Measuring a journals impact - Elsevier

The Journal Impact Factor should be used with informed peer review. In the case of academic evaluation for tenure, it is sometimes inappropriate to use the impact of the source journal to estimate the expected frequency of a recently published article. Again, the Journal Impact Factor should be used with informed peer review.
